Art Unit: 3738

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 67-72 and 74-81 are rejected under 35 U.S.C. 103(a) as being unpatentable over Goicoechea et al., US 5,683,450. The embodiment of Figure 5 is designed for potential use as a sole implant, and thus the legs **58** and **60** are certainly configured to extend into bifurcated sections of the vasculature, as explained at column 11, line 52, through column 12, line 5. The "extender in the form of a graft" (present claim 67, line 7) is equated with one of the optional separate prostheses mentioned at column 11, line 66 et seq. Different lengths for the legs <sup>58</sup>~~60~~ and **60**, a feature which was well known in the art at the time of the instant invention, would have been obvious in order to accommodate arterial anatomy and/or aneurysmal asymmetry, particularly in the absence of any criticality (in the Applicant's original disclosure) for the longer leg in combination with the extender as claimed (*In re Kuhle*, 188 USPQ 9).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Attention is directed to Figures 17, 37, and 40, and to column 20, lines 1-8, of US 5,628,783.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dave Willse, who is available Monday through Thursday and whose telephone number is (703) 308-2903.
